Agricultural Memoranda No 983A

Extending the 'Complete' Agromet Data-set

Agricultural Memoranda No 983 described the requirement for, and the creation of, a 'complete' data-set of 94 meteorological stations in England and Wales.

Further projects in Met O 8a have identified the need to extend this data-set to include sites in Scotland and Northern Ireland.

Appendix 1 lists 27 stations that have been processed, using the same techniques as described in the aforementioned Ag Mem, and added to the 'complete' data-set.

Appendix 2 is a map showing the location of all the stations on the data-set.
